

BI360: The Ideal FRx and Forecaster Alternative!

BI360 is the ultimate **Excel-based Reporting, Budgeting & Dashboard** solution. It has a **Data Warehouse** too, to connect all of your data sources!

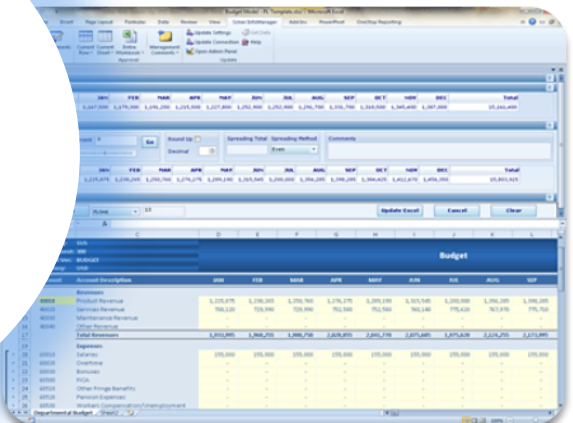

With out-of-the box integration to many major ERPs, including all the Microsoft Dynamics solutions, BI360 offers a solution with capabilities that include **Excel-based reporting and budgeting, dashboards and a preconfigured data warehouse**. Mix and match the modules you need, use the entire suite, or buy one module at a time as your organizational needs grow. Our partners and customers agree that BI360 is the right alternative for companies looking to find the next-generation reporting and budgeting solution.

“The more I use BI360 the better I get at it. Once people see it, it pretty much sells itself.”

- Richard Wheeler
