

# Event Reporting & Budgeting for

Sports Events ■ Trade Shows ■ Conventions ■ Concerts ■ Special Events

Finally a flexible and easy to use reporting solution for Event organizers! Enterprise Reporting gives you a single tool where you can upload or input financial and statistical information for each of your events.

Based on the open Microsoft SQL Server database, Enterprise Reporting will quickly become a valuable tool for tracking all financial and statistical information related to your events. The powerful data entry forms and report writer will deliver any detailed or summarized report you need to owners, promoters, auditors, artists, etc. For the high level analysis and control, you will get consolidated reports across events and event categories, as well as executive event dashboards.

## Benefits

- Graphical dashboards for management analysis of events and venues
- Automatic e-mail distribution of reports to anyone that requires financial and statistical information from an event
- Full, detailed reporting per event
- Consolidated reporting across events
- Replaces your existing Excel-models and proprietary systems with a single, secure database and Windows interface
- Full event budgeting module included
- Reports available immediately upon completion of events to analyze success
- Quick ROI due to improved planning & control

## Features

- Event trees for roll-up
- Integration to ERP system
- Excel add-in
- Drill-down to lowest event detail
- Full security
- Powerful built-in reporting formulas
- Optional Web portal interface
- Report scheduling and report books
- Completely based on the Microsoft platform
- Parameter-driven input templates and reports (e.g. for periods, events, venues, etc.)
- Optional integration to ticket systems
- Optional ticket system data warehouse and reporting
